

Analytical Chemist, Analytical R&D

JOB DESCRIPTION

Oryza Pharmaceuticals is seeking a chemist to join the company in its analytical R&D laboratory in Coral Springs, Florida. This is an opportunity for an individual to join an emerging specialty pharmaceutical company and work closely with formulation scientists on pharmaceutical product development. The successful candidate will:

- Conduct analytical testing including identification, assay, purity and dissolution for drug substances, excipients and finished drug products
- Develop and validate analytical methods as necessary for pharmaceutical drug product testing
- Document and present analytical results to support formulation development and regulatory filing
- Participate in analytical instrument maintenance, qualification and trouble-shooting

QUALIFICATIONS

- Minimum of BS degree in Chemistry with 2 years, or MS degree with 1 year, of relevant experience in Analytical R&D or QC lab of pharmaceutical industry
- Must be comfortable working within the lab setting and knowledgeable about the requirements of current Good Manufacturing Practices (cGMP)
- Working experience with UV-Vis, HPLC, Dissolution and other applicable analytical instrumentation
- Capable of routine or assigned sample analysis to support product development following compendial and/or other written methods
- Familiar with analytical instrument maintenance
- Excellent communication, interpersonal and writing skills
- Sufficient computer skills specifically on Microsoft Word, Excel and PowerPoint

Qualified candidates should submit their resumes directly to career@oryzapharma.com.
